

Does Your Dog Need a Dentist?

February is National Pet Dental Health Month

According to the American Veterinary Medical Association (AVMA), by the time a pet reaches two years of age, 80% of dogs and 70% of cats have some form of periodontal disease. Periodontal infections have been linked to diabetes, heart attacks, strokes, kidney disease and other life-threatening illnesses.

In conjunction with National Pet Dental Health Month, Central Veterinary Associates has a special offer to encourage you to consider your pet's dental health.
